RACHITH KUMAR M

Aspiring Data Analyst / Data Scientist

Vadodara, Gujarat, India | +91 86189 68823 | rachirachith8@gmail.com
github.com/rachi2006

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, Parul University) with hands-on experience across the data analytics stack — Python, SQL, Excel, Power BI, and Tableau — plus practical exposure to forensic technology and business-insight reporting through Deloitte and Tata Forage job simulations. Built and deployed a full-stack Flask/MongoDB web application and an Excel-based analytics dashboard covering 1.5B+ user data points. Comfortable moving from raw data to cleaned datasets to visual, decision-ready insights. Seeking an entry-level Data Analyst/Data Scientist role to apply these skills on real business problems.

SKILLS

- Languages & Querying: Python (Pandas, NumPy,), SQL
- Visualization & BI: Power BI, Tableau, Microsoft Excel (Pivot Tables, KPI Dashboards, Charts)
- Data Analysis: Data Cleaning, Exploratory Data Analysis, Statistical Consultation, Business Insight Reporting
- Development: Flask, Django, Git/GitHub, MongoDB
- Spoken Languages: English, Hindi, Kannada, Telugu

CERTIFICATIONS

- Deloitte Australia — Data Analytics Job Simulation (Forage), Jun 2026 — completed practical tasks in data analysis and forensic technology
- Tata Group — Data Visualisation: Empowering Business with Effective Insights (Forage), Jun 2026 — framed business scenarios, chose and built effective visuals, and communicated data-driven insights
-

PROJECTS

AI Usage Dashboard 2026 — Excel Analytics Dashboard

Built an interactive KPI dashboard in Microsoft Excel analyzing global AI adoption trends.

- Cleaned and structured raw usage data, then modeled it with pivot tables for analysis
- Designed KPI cards and charts surfacing insights on 1.5B+ monthly AI users and adoption trends across demographics and industries
- Applied dashboard design principles to make complex trend data accessible to a non-technical audience

SkillPath — Personalized Learning Roadmap Generator

Full-stack web app (Flask, MongoDB) that generates structured, skill-based learning roadmaps for users.

- Built secure authentication with bcrypt password hashing and session-based login
- Designed a roadmap engine that generates structured topic paths with resources for any input skill
- Implemented a progress-tracking dashboard letting users mark topics complete and track learning journeys
